

The Untapped Connection Between Coding and Artistic Inclinations

```
def nenna_ndukwe():  
    Software Developer @ Bison  
    Computer Science Student @ BU
```

“Science is an art &
art is a science.”

/*

Algorithms & Data Structures

Functions & Variables

Theory (& History)

Vocabulary

*/

<!-- Connecting the Code -->

let music = () => { crescendo, half notes, staccato, accidentals, whole rests }; /*

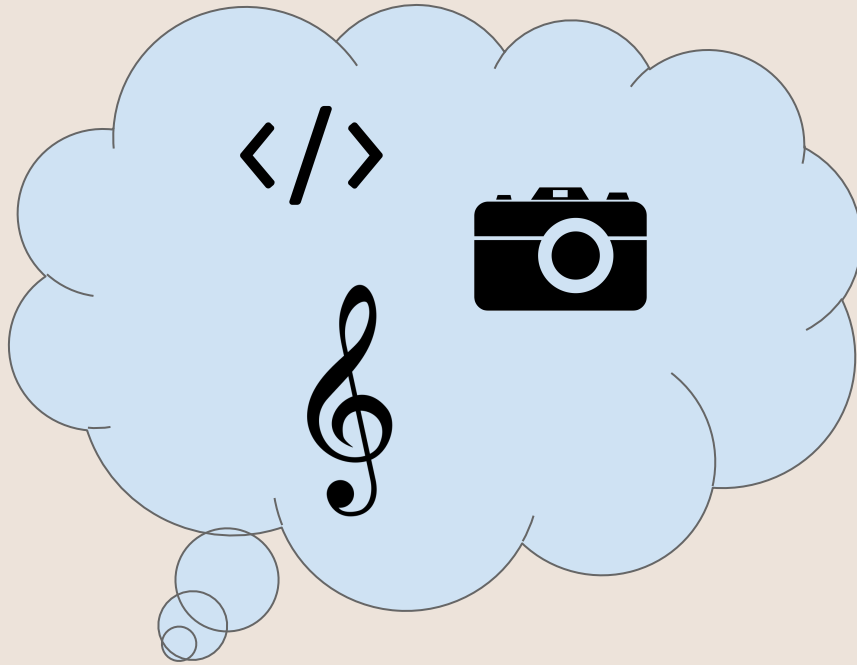

let writing = () => { voice, character development, dialogue, denouement};

let language learning = () => { grammar, idioms, pronunciation };

These are all systems that must be learned in a methodical manner. They have patterns that have abstractions and classifications.

*/

Why Your Art & Your Code Complement Each Other

Design

Photography

Architecture

Videography

Film

Illustration

Speech

Diversity in experience in thought creates value in the workplace and personal life. Multifaceted interests are part of what allows for improved creativity, collaboration, and skill in the pursuit of passion and knowledge.
